ICON - SOCIALS

Main
Used across print, signage, and primary brand touchpoints. Disciplines set beneath the wordmark vary by studio and service offering.

Stacked
Reserved for narrow or constrained formats — signage, ad units, and collateral where the horizontal lockup won't read cleanly.

Icon
The single-letter mark for profile imagery and social applications, where the full wordmark would compete with the frame.

TITLE	Design Rooted in Place	HTF Didot—wordmark & hero titles
SUBTITLE	CLASSICAL, WARM & PRECISE	Whitney—body copy, labels, eyebrows
HEADING	Section heads & pull quotes	Cormorant Garamond—section heads, subtitles

Who We Are

04

Design rooted in classical principles, responsive to place, and built to endure.

Founded in Atlanta in 1991, Harrison Design is one of the most acclaimed full-service design firms in the United States. With six offices across the country, the firm combines the depth of a national practice with the attentiveness of a studio deeply invested in each client's vision.

A comprehensive firm in the truest sense, Harrison Design offers architecture, interior design, and landscape architecture under one roof—from ground-up residential commissions and historic renovations to sacred architecture and bespoke interiors.

The firm's body of work spans the full spectrum of scale and style, from intimate residences to sweeping estates, from coastal retreats to urban townhouses. Each project reflects the same conviction: that great architecture serves the life it shelters.

What We Do

05

Architecture*i.*

High-end residential design is the core of the practice, spanning single-family residences, estates, and large-scale renovations, from classical to contemporary—extending to commercial commissions, hospitality, multi-family developments, and sacred architecture.

Interiors*ii.*

The interior studios create environments tailored to each client's lifestyle — space planning, custom finishing, furnishing, and accessorizing — interpreting each project's architectural parameters to produce interiors that are balanced, warm, and personal.

Landscapes*iii.*

The landscape studio takes a holistic approach to every site, designing gardens, pools, and entertaining spaces with sensitivity to environment and sustainability — connecting architecture seamlessly to the land.

Tone & Voice

06

Authoritative

Thirty years of demonstrated expertise across architecture, interiors, and landscape. Statements are measured, grounded in craft, and never boastful—let the work speak.

Warm & Client-Centered

Every project begins with listening. Copy reflects deep investment in each client's way of life — collaborative, personal, and never transactional.

Classical

Drawing on history without being imprisoned by it. Language names things precisely — masonry, stucco, patina, grain — so the architecture feels inevitable where it stands.

Honored with ten Shutze Awards, two Addison Mizner Awards, and two Palladio Awards — with features in Architectural Digest, Veranda, and House Beautiful.
